I. Call to Order

The meeting was called to order at 3:03 pm.

II. Welcome/Introductions

CQM Support Staff welcomed all attendees, made a statement of the meeting's goal, and made individual introductions. They updated the contact list with the Network for the new fiscal year.

III. Data Presentation: FY2022-2023 PSRA Scorecards

The CQM Support Staff reported on the fiscal year 2022-2023 annual data in the form of Priority Setting and Resource Allocation (PSRA) scorecards for the Oral Health Network. The purpose of the PSRA scorecards is to inform the PSRA committee of

the utilization of these services and the allocation and expenditures for each service category. These scorecards contain data around service utilization, demographics, an overview of the Care Continuum data, and a breakdown of the virally suppressed clients.

The CQM Support Staff identified trends during the fiscal year 2022-2023. Some common trends seen across all the service categories were that the male (74.5%) subcategory comprised most of the population and the Black Non-Hispanic group (40.4%). When it came to the Federal Poverty Level (FPL), the majority of the clients resided in the 300% and lower category.

The CQM Support Staff discussed data issues surrounding retention in care and provided the Network with a breakdown analysis of those virally suppressed from categories such as risk factors and education level.

After the data presentation, the CQM staff member shared the Special Projects of National Significance (SPNS) Oral Health Initiative pocket guide to “Engaging and Retaining People Living with HIV/AIDS in Oral Health Care.” This guide contains information about barriers to care, critical unmet needs, and key recommendations to help engage and retain people living with HIV. The CQM Staff provided some Oral Health initiatives with the Network, such as promoting health literacy and conducting outcome assessments. After the discussion, CQM Support Staff announced that BCOM would present for the next case study.
