- **FY2022-2023 PSRA Scorecards Data**

The CQM Support Staff reported on the fiscal year 2022-2023 annual data in the form of Priority Setting and Resource Allocation (PSRA) scorecards for the Support Services Network. The purpose of the PSRA scorecards is to inform the PSRA committee of the utilization of these services and the allocation and expenditures for each service category. These scorecards contain data around service utilization, demographics, an overview of the Care Continuum data, and a breakdown of virally suppressed people.

For each Support Services category, the CQM Support Staff identified trends during the fiscal year 2022-2023. Some of the common trends seen across all the service categories were that the male subcategory comprised most of the population as well as the Black Non-Hispanic group. When it came to the Federal Poverty Level (FPL), the majority of the clients resided in the 300% and lower category.

CQM Support Staff discussed data issues surrounding retention in care and provided the Network a breakdown analysis of those virally suppressed from categories such as housing type and education.

III. Announcements
